

## INFORMATION SHEET "TEST LABORATORIES"

updated: November 2023

The original of the **marketing authorisation / batch testing** application with the respective documentation and with the **indication** „Testkit bei ... eingereicht am ...“ ("test kit filed with ... on ... ") must be sent to the licencing authority.

Experimental testing for the decision on a marketing authorisation or batch testing of in vitro diagnostics are done in the following laboratories. The addresses are listed below.

The **duplicate** of the **marketing authorisation / batch testing application** with the respective documentation and the **samples of the product** required for experimental testing must be sent directly to the test laboratory for the respective disease in Jena (in sufficient quantity pursuant to section 32 sub-section 2 of the Regulation on Animal Vaccines). **For products that are to be tested at the test laboratories on the Isle of Riems** (see list below), **the above mentioned documents and samples should be addressed and sent directly to the Licencing Authority Insel Riems (Dr. Heidrich).**
