## **34<sup>th</sup> MYCOTOXIN-WORKSHOP**

14 May - 16 May 2012

Stadthalle, Braunschweig, Germany

The Institute of Animal Nutrition of the Friedrich-Loeffler-Institute, Federal Research Institute for Animal Health, and the Society for Mycotoxin Research would like to invite you to the 34th Mycotoxin-Workshop, which will be held in Braunschweig, Germany.

Braunschweig's history is closely linked with that of the Guelphs. Braunschweig became the residence of the Guelph Duke Henry the Lion and was later declared Emperor's City under Otto IV. thus developing into one of the most important German trade centres in Middle Europe. Besides Dankwarderode Castle, St. Blasii Cathedral and the picturesque half-timbered buildings around St. Magni Church, it is the Lion Statue, even today heraldic animal of the city, which demonstrates the rich and over a thousand year long history of Braunschweig.

The conference venue will be the Stadthalle Braunschweig. With its professional facilities the Stadthalle provides the perfect location for an efficient and inspiring workshop. The venue is within walking distance of the central station and many hotels as well as the city centre.

Please register online for participation, presentation of posters or lectures.

<http://www.braunschweig.de/mycotoxin-workshop>

Please note the following fixed dates:

02.03.2012 deadline for registration of scientific contributions (posters and lectures)

16.03.2012 deadline for registration of participants

16.03.2012 deadline for the submission of abstracts (posters and lectures)

We are looking forward to welcome you in Braunschweig.

With kind regards,

Prof. Dr. Hans-Ulrich Humpf

President of the Society for  
Mycotoxin Research

Prof. Dr. Dr. Sven Dänicke

Head of the Institute of  
Animal Nutrition of the FLI
